

Topic: Public Works Report

For Meeting Date: December 15, 2021

Report Date: December 14, 2021

Prepared by: Luke Lockhart

Transportation:

- With the mild temperatures lately, there hasn't been much for snow removal, however we have still had to have the sand truck out on an almost daily basis to keep up on icy spots throughout town.
- The loader has been out of service off and on for the last few weeks as it was coding up with emission control system issues; we believe it is back in good order now.
-

Utilities:

- See November Water report.
- Tuesday December 21st we will be having our biannual water plant inspection with the Water Security Agency.
-

Environmental Health:

- (continued from before) We will be doing some ground work at the landfill site this week, and next to provide a better tipping area; including a new location for the cardboard bin, and the sea can. We also have some backfilling and leveling to do around both the office building, and compactor shed.
- The compactor has had some more issues with the brake system losing pressure, we have Kalm Mechanical working on it with parts on order expected to be here late this week.

General Public Works:

- We have gone through the upcoming years operational, and capital budgets; we are waiting on some final numbers still, but are very close on it.
- The Christmas display is up in the park and looks great, thanks to everybody who helped out!
