

Topic: Utility Report

For Meeting Date: January 12, 2023

Report Date: January 12, 2023

Prepared by: Luke Lockhart for Kelton MacDonald

Utilities:

- Brunner Construction has recently replaced six faulty residential sewer connection lines for us.
- Contech completed the first part of the water/sewer rehabilitation job on McKenzie St S, and Saskatchewan Ave, we are expecting their return in May to continue with the remainder of phase 1 for this project.
- All of the test wells, and monitoring wells have been installed for our raw water supply project, initial flow test results look very promising.
- Our water treatment plant upgrade project including UV disinfection, and upgrades to various controls and piping routes within the plant is well into the engineering stage, we expect this project to be complete in 2023
