

Topic: Public Works Report
For Meeting Date: July 27, 2022
Report Date: July 25, 2022
Prepared by: Kelton MacDonald

Transportation:

- DLN Construction has completed the roadwork that was set for Railway Avenue, as well as the first block of Hearn Street. DLN has begun the road construction on McKenzie Street North.
- Hank's concrete has been working through our 2022 sidewalk list. Sidewalk ramps will be started once regular panel work has been completed.
- All gravel roads have been graded, and another application of dust suppression was applied at all regular areas on Saturday July 23rd.
- Back alleys have been touched up throughout Town, we may be doing some extra attention in certain areas for weed control as well.
- We have begun our 2022 Town wide curb/gutter painting, and crosswalk painting will follow once curbs are complete.

Utilities:

- We had an issue with one of our Main Lift Station Sewage discharge pumps. The problem has been diagnosed, and remedied, although the pump and motor will require a full service before fully operational again. Repairs are underway.
- The South Saskatchewan River level has maintained adequate levels thus far.

Environmental Health:

- Landfill has continued to see increased usage over the summer months.
- Landfill Scale software is operational, training on new programs/software still in progress and we are working towards a soft launch.
- Compost pick-up continued in full swing, compost piles turning over very healthy this year due to increased moisture.
- Our staff have compacted the pallet pile, and can now re-use the material for temporary cover when building the landfill cell.

General Public Works:

- Another round of spraying application is in progress, will continue until complete
- Mowing and snipping is still in full swing.
- We have plans to begin town wide branch trimming in problem areas soon, such as intersections with bad sight lines, overgrown back alleys, and overgrown streets.
- We've been putting up Chamber of Commerce Banners, and should be complete this week.

June Water Plant Statistics:

- Over the Month of June the Water Plant produced a total of 9'266'300 Imp. G
- The Turbidity Range off the Filters was "0.059NTU – 0.154NTU"
- The Total Chlorine Range was "0.95-1.70mg/L"
- The Free Chlorine Range was "0.73-1.40mg/L"
