

Topic: Public Works Report

For Meeting Date: May 5, 2022

Report Date: May 5, 2022

Prepared by: Luke Lockhart

Transportation:

- We have been going hard on the potholes all around town, and have got the majority of them patched. We started with the bigger ones and have now started to go back over and do a more thorough job hitting all of the smaller ones.
- Virtue Construction has finished our first street sweeping for the year; as in the previous years, we are very content with the job they have done.
- All gravel roads have been graded and are now awaiting gravel, which will be shortly followed by an application of calcium in the areas needing dust suppression.
- I have compiled our initial asphalt patching list for DLN Construction which is primarily composed of dig out areas from sewer replacements and hydrants that were done last year; in addition to these areas, we will be getting them to do some overlay on sections of the highway pending budget amounts.
- We have received pricing from both Acadia Construction and DLN Construction for full street repairs; these will be passed on to council to make a decision.
- We have opened a tender for sidewalk repairs for 2022 and will award once the tenders have closed.

Environmental Health:

- Landfill hours have switched over to summer hours; so far it has been very busy.
- We are still waiting on the hardware and software for the landfill scale.
- Compost pick up has begun with many residents already getting their yards cleaned up, there is a lot out there.

General Public Works:

- "Depot" renovations are going along very well, Loren has done a great job as always. We have posted a tender for the overhead door installation and are awaiting it to be awarded.
- We would like to meet with the cemetery committee in the near future to discuss what we are wanting to do out there as some "ideas" may require planning, and or time to out in place.
- To date, we have interviewed 1 student for summer employment, and are hoping to get in more resumes to fill all of our positions.
