

Topic: Public Works Report

For Meeting Date: October 6, 2022

Report Date: October 5, 2022

Prepared by: Luke Lockhart

Transportation:

- DLN Construction has completed the paving on Cedar Place; this concludes our paving projects for 2022.
- We have started another round of pot hole repairs including residential streets as well as the highway sections.
- Hank's Concrete has finished all of our sidewalk access ramps, remaining sidewalk work to be done is the section in front of the bakery.
- We have received our street sweeper, and have swept the majority of town to date; we will continue to sweep as needed for leaf pickup. Our sales representative will be onsite next Friday to answer any operational questions we may have.

Utilities:

- We have noted 4 residential sewer connections needing replacement, along with 2 fire hydrants, and 2 main water valves; these have been passed on to Brunners to complete over the next few months.
- Raw water intake, floc chambers, and lift station cleaning will be done next Wednesday.

Environmental Health:

- Groundwater monitoring for the landfill, and the lagoon have been completed by Tetrattech, we do not have results back as of yet for either.

General Public Works:

- Compost pickup is still steady with garden refuse and leaves.
- We will be doing some tree trimming in alleys, and overhanging streets in the near future.
- We have added 3 members to our public works team; Brad Bilodeau at the landfill, and Clay Gamble and Graham Thomson for general public works department.
