

Report Type: Recreation Report
For Meeting Date: October 19th, 2022

Prepared by: Megan Anthony

The recreation department has been busy making ice over the last few weeks. We will have the skating ice ready for our user groups by October 17th. We began the curling ice October 11th and should have it completed by the end of October.

The RecPlex has been receiving some TLC over the last few weeks with the new boiler system being completed, the ice plants both received some repairs as well as our Olympia. We are also upgrading the water fountains at the rink to include a water bottle fill up station. Living Skies electrician, Josh, came out to check over our delta controls program as we were having a few issues with it and he has rectified those issues. Our kitchen manager Laurie Anholt has been in the kitchen for the last few weeks organizing and getting ready for the kitchen season. We have purchased a new point of sale system for the kitchen and we are looking forward to the ease of sales with this new program as well as a more efficient way of reporting and keeping track of the inventory.

We look forward to a busy skating and curling season ahead of us!
