Dutch Elm Disease

Dutch Elm Disease (DED) is caused by a fungus spread by elm bark beetles that breed under the bark of dead or dying elm wood.

The Town will be marking and inspecting trees throughout the season

If wood contains DED fungus, each new generation of beetles can infect healthy elms

- You can help prevent DED by:
- Keep your own elm trees healthy;
 - **Do not prune Elm trees from April 1st to August 31st;**
 - If you see signs of DED, report them to the Public Works Department;
 - Don't buy, sell, store, transport or use elm firewood; it is illegal;
 - Remove and dispose of the tree promptly if DED is confirmed

2023 Branch Pickup Dates

May 23rd – May 26th

July 3rd – July 7th

Sept 5th - Sept 8th

Compost Pickup

Will begin the 1st week of April.

Lawn clippings, leaves & other garden refuse may be left in brown compostable paper bags, a neat pile or placed in an open bin.

We prefer that compost not be placed in plastic bags as they tend to blow away after they have been emptied.

Have compost out for pick-up by 8:00am Mondays to ensure pick-up during the week.

Bagged Household Garbage

Double bag any household garbage that has liquid contents or items that may leak. Keep all garbage bags to a manageable weight under 50 lbs.
